

# Business Call SME

## Solution Description

Nashua ECN's BusinessCall SME solution is an offering ideally suited for small to medium enterprises to reduce their monthly telecommunication costs.

The solution makes use of innovative voice over IP (VoIP) technologies to transmit voice calls over a broadband data connection. The solution also takes advantage of un-contended IP network to ensure that all calls, between a customer's PBX and Nashua ECN's Next Generation Network, are of the highest quality.

## Solution Offering

Apart from a customer supplied PBX, the following will be provided:

- A Nashua ECN Number – a number from Nashua ECN's number range or a non-Nashua ECN number ported to Nashua ECN.
- A Gateway - connected to the PBX to trans-code calls between the PBX and the data connection.
- An ADSL Connection.

## Solution Costs and Terms

The basic monthly cost (excluding call charges) will be R 999 (excluding VAT).

Additional monthly fees may apply if the solution requires additional infrastructure.

The solution will be installed subject to a 12-month contract.

A once-off installation fee of R 2,500 (excluding VAT) will be charged.

## Technical Support

All ADSL lines will be proactively monitored and technical support is available through Nashua ECN's 24/7/365 helpdesk.

### Additional Value Added Services and Products

Nashua ECN provides additional value added services and products to complement its basic voice offerings:
