Introduction

It is with great pleasure that the Managing Members of Triple M Communications CC an Accredited Siemens Reseller and Installer for over 10 years offer our experience in the ***Telecommunication, IP, VOIP Routing and Structured Cabling and Fibre arena's*** to you so that we may assist you in finding the correct solution for your company requirements, we undertake the installation and commissioning of the recommended solution, project management is offered, training and TELKOM liaison for current offerings in the SME Market, we specialise in supplying and installing of structured cabling and have expanded our business to include ventures in civil construction building routes for BTS sites and Optic Fibre Installations.

Triple M Communications is located in Eldoraigue Centurion, our company consists of a Admin portion who handle the day to day organisation, a sales department, technical department which is divided into maintenance and a installation/commissioning division, all system configuration is managed by our installation team "***the hands on people***" and lastly our civil construction crew. Equipment is stored at our secure warehouse at our office in Centurion.

The proposal submitted will provide a guideline on the manner in which we aim to offer and provide our service to you. As stated this is merely a guideline and any process or requirement specified can be refined or removed on deliberation between the two parties concerned, so that a customized client solution is reached.

Our goal is to provide and maintain a high standard of service to all our customers at all times.

Information Profile

Triple M was established in 1999 as a Closed Corporation by Messer's P Bardone and E Draper. The combination of their skills and considerable experience of over 30 years in the Telecommunication Industry lead to the establishment of a company which can offer a **Sales Solution** and a **Service Solution** to Clients and Companies in all sectors.

With the increasing demands in the market it was decided to broaden our arisen and to enter into the Civil Construction arena our expertises currently lie in the Optic Fibre Civil Arena which entails the laying of duct, blowing and splicing of fibre, backfilling, compacting, and reinstatement of route build sites as well as BTS Sites.

Triple M has currently a staff compliment 30 staff members consisting of both skilled and unskilled employees. The workforce consists of a mixture of both Affirmative and Non affirmative employees. Ongoing training is provided to all staff members ensuring that a satisfactory level of service to our clients while providing necessary skills to uplift the individual.

Triple M has an ever expanding customer base of approximately 600 Companies which is manage successfully.

Triple M Communication CC was accredited by Siemens form the onset, with the aid of continuous training and development programs run by both Siemens and its affiliates we have remained as one of only a small number of accredited companies still successfully operating.

Triple M is not a franchise and in that respect any service offered and carried out by instruction will be guaranteed by Triple M Communications CC.

The mission statement at Triple M is "**To provide the best customer solution and service the first time**".

TRIPLE M COMMUNICATIONS IS BEE COMPLIANT.
